

## Exercise 2.5

Create an empty document (named “Task-2.5” or similar), mention your models/tables from Exercise 2.3, and specify if (and why) you’re changing any attributes. This will include the addition or deletion of attributes, updates in data type, moving attributes from one table to another, or any other reason that you consider important.

I am changing the model/table Recipes because I want to add two new attributes (pic and method). I want to allow pictures to be uploaded and method (instructions) to be inserted for Recipes. I also added a reference to the user (creator/author) in the recipe.

CATEGORY	ATTRIBUTES
recipes	id, name, ingredients, cooking_time, difficulty (hard, medium, intermediate, easy), <b>pic</b> , <b>method</b> , <b>user_id</b>
ingredients	id, name
users	id, username, password, name
notes	id, user_id, recipe_id, user_note
